

Powerflow™ AW Hydraulic Oil

Phillips 66® Powerflow AW Hydraulic Oil is a premium quality anti-wear hydraulic oil developed for use in a wide variety of industrial and mobile hydraulic systems operating under high-pressure, high-temperature conditions. It is formulated to provide enhanced wear protection and deposit control for severe service applications. It is particularly recommended for use in plastic injection molding machines where deposit control in the hydraulic circuit of the electro-pneumatic servo valves is essential for trouble-free operation.

Powerflow AW Hydraulic Oil is formulated to provide excellent wear protection for hydraulic pumps and motors, and to protect hydraulic system components against rust and corrosion. It has excellent oxidation resistance and thermal stability at high temperatures to minimize deposit formation and provide long service life. It has excellent water-separating properties to minimize the formation of emulsions, and is resistant to excessive foam buildup that can cause poor or sluggish hydraulic system response.

Powerflow AW Hydraulic Oil meets the performance requirements of all major hydraulic pump manufacturers, and is recommended for use in all types of high-pressure, high-speed hydraulic pumps.
